WATER FILTERS CALMAX S & CALMAX C

A housing for heavier users of water, such as farms, offices and factories. Choice of 2 cartridges - Sediment or Carbon Block.

SPECIFICATIONS

WATER FILTERS

CALMAX S & CALMAX C

CalMax S is designed for heavy usage when the demand for filtered water is high – the ideal solution for the office, factory etc. A robust housing unit, combined with powerful Max S cartridge, guarantees the highest level of filtration efficacy. The special wound filter construction of the Max S cartridge, extensively tried and tested in industry, effectively combats problems with sediment, dirt and discolouration of water. Contaminants are trapped within the special cartridge matrix, giving maximum filtration performance. CalMax S is easy to install by connecting to an existing tap. Little maintenance is required for a continuous supply of finely filtered water.

CalMax C is the perfect choice when demand for water is high – ideal for the office or factory. This robust drinking water filter is suitable for connecting to an existing water tap. Features include the special Max C cartridge and housing, fine grade carbon, and small mesh cartridge construction for achieving high chlorine reduction. CalMax C is also highly recommended for treating sediment, dirt, discolouration, unpleasant taste and smell, organic material, bacteria, cysts and heavy metals. CalMax C is built for durability combined with high filtration performance.

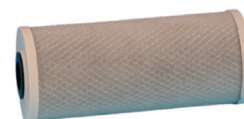

Housing height	350mm
Housing diameter	182mm
Filter cartridge option	Max S (sediment) or Max C (Carbon block)
Filter cartridge replacement	Recommended at least twice annually dependent on water quality.
Colour / material	Black manifold head with blue bowl. Polypropylene.
Maximum working pressure	8 bar (112 psi)
Minimum working pressure	1 bar
Maximum temperature	Max S = 50°C. Max C = 35°C
Maximum flow rate	Max S = 60 L/min. Max C = 42 L/min
Inlet & outlet	1" BSP (female thread)

Benefits:

- Continuous supply of finely filtered water – better for drinking and cooking
- High chlorine reduction
- Combats problems with sediment, dirt, discolouration, poor taste and smell
- Reduced organic material, bacteria, cysts and heavy metals
- Complete kit ready for installation
- Saves money – no need to buy expensive bottled water
- Continuous supply – suitable for connecting to an existing water tap
- Quick under-sink installation
- Easy to change cartridge
