WATER FILTERS

CALSLIM R & CALSLIM C

Space-saving CalSlim R fits neatly under the sink to give a continuous supply of cleaner, filtered water, delivered through the stylish slim line tap included in the kit. The special Slim R cartridge is extensively tried and tested for improving poor water taste and smell, whilst reducing chlorine. CalSlim R is highly recommended for use in hard water areas for the effective filtration of the scale and scum present in hard water – tea and coffee taste better and kettles remain scale free.

Space-saving CalSlim C comes complete with its own stylish slim line tap, making it the perfect under-sink solution for combatting problems with poor tasting or unpleasant smelling water. The effective Slim C filtration cartridge traps dirt particles in its special matrix – it is also suitable for reducing chlorine. With quick and easy installation and low maintenance, an endless supply of finely filtered water is yours at the touch of a tap.
